PROJECTS

Web Scrapping For Product Comparison
front end | 4 Month | Team member(s): 4
The project involves real-time data scraping from a prominent e-commerce website using the Scrapy framework, ensuring the availability of precise and structured data. Efficient data storage is facilitated by a MySQL database at its core, the project comprises an intuitive web application developed using JavaScript, HTML, and CSS. This user-friendly interface enables users to effortlessly search for tech products, review specifications, and conduct side-by-side product comparisons.
